

## Thermally separated ceiling connector

Steel balcony, cantilevered or supported, renovation

Wall with thermal insulation composite system

Detailed view above wall | below wall

DCIK 46-03-WW | M 1 : 10

Component, example	
①	Thermal insulation composite system
②	Masonry wall or reinforced concrete wall
③	Interior plaster
④	Covering, substructure
⑤	Steel profiles with corrosion protection
⑥	Head plate with cleat, adapter
⑦	Schöck Isokorb® T type S
⑧	Wooden floorboards on substructure
⑨	Steel member

Component, example	
⑩	New replacement, wood
⑪	Moisture protection
⑫	Plastering profile, joint sealing tape
⑬	Railing
⑭	Substructure
⑮	Sloped aluminum tray
⑯	Aluminum composite panel, substructure
⑰	Steel support, optional based on statics
⑱	Wooden beam ceiling, existing

Note: This detailed view is a general, non-binding planning proposal which only provides a schematic overview of the construction work. The planner and processor are responsible for checking applicability and completeness for each construction project. Adjacent components are only shown schematically. All specifications and assumptions must be adapted or coordinated to local conditions. The respective technical specifications of the data sheets, processing guidelines, standards, and system approvals must be observed. Balconies, arcades, and canopies require their own statics.
